EDITORIAL

The edition of the annual college magazine is brought to you mark Sharadchandra pawar college of pharmacy's 13 years of excellence.

This statement has proved to be true in our case. Sharadchandra Pawar College of pharmacy's 13 years of establishment has shown that it has come a long way in fulfilling the expectations of many through its Academic excellence. Every year which has passed, has always added to its growth. To re-live some such memories of the past years, efforts have been made to show the enthusiasm of the students in various fields.

The magazine continues to expand its reach to achieve its vision of being a truly representative of the Sharadchandra Pawar College of pharmacy.

The Editorial Board hopes to build on this ethos just as much during the upcoming academic years.

38. ALUMNI MEET REPORT 2016-17

Alumni Association of Sharadchandra Pawar college of Pharmacy, Otur, Pune, was conducted on 12th of March 2017. Alumni association is the primary communication link between the college and our alumni. It is our goal to encourage and foster lifelong alumni involvement and commitment. We SPCOP are working towards creating opportunities to network, share nostalgic moments, help our juniors and be partner in the growth of SPCOP. The program was started with a welcome address by Mr. Jayant S. Bidkar, Associate Professor, Department of Pharmacognosy, SPCOP, Otur followed by a video presentation showcasing the growth of the campus over the years. Dr. Dama G.Y., Principal, SPCOP, Otur, addressed the gathering and gave a brief report on the achievements of the campus including

achievements of present students & teaching faculty. Dr. Dama Sir also stressed on the need of alumni to actively come forward for initiatives for connecting with each other and sharing more information related to placements for fellow alumni as they can be a great networking resource. Different cultural programs and games were conducted by the current students as part of the meet which ended with group photo session. Student council committee & Alumni Functional committee were in charge for organizing & co-coordinating the whole event. The entire event was covered by the Third Year B. Pharm. Gymkhana committee members with the guidance of Principal Dr. Dama sir & cultural Incharge Mrs. Shital J. Bidkar with their excellent photography skills.

THE IMPORTANCE OF REPETITION (the way of the bow)

*Prof. Jayant S. Bidkar
HOD, Department of Pharmacognosy,
SPCOP*

An action is a thought made manifest.

The slightest gesture betrays us, so we must polish everything, think about details and learn the technique in such a way that it becomes intuitive. Intuition has nothing to do with routine, but with a state of mind that is beyond technique. So, after much practicing, we no longer think about necessary movements: they become part of our own existence. But for this to happen you must practice and repeat. And if that isn't enough, you must repeat and practice.

Look at a windmill. To someone who glances at it sails only once, they seem to be moving at the same speed, repeating the same movement, but those familiar with windmills know that they are controlled by the wind and change direction if necessary.

The archer allows many arrows to go far beyond the target, because he knows that he will only learn the importance of bow, posture, string and target, by repeating his gestures thousands of time and by not being afraid to make mistakes. And then comes the moment when he no longer has to think about what he is doing. From then on, the archer becomes his bow, his arrow and his target. Once the arrow has been shot, there is nothing more the archer can do, except follow its path to the target. Therefore, the archer keep his eyes fixed on the flight of the arrow, but his heart rest and he smiles. If he has practiced enough, if he has managed to develop his instinct, if he has maintained elegance and concentration throughout the whole process of shooting the arrow, he will at that moment, feel the presence of the universe and will see that his action was just and deserved.

Technique allows the hands to be ready, the breathing to be precise and the eyes to be trained on the target, instinct allows the moment of release to be perfect. Anyone passing nearby and seeing the archer with his arms open, his eyes following the arrow, will think that nothing is happening. But his allies know that the mind of the person who made the shot has changed dimensions: it is now in touch with the whole universe. The mind continues to work, learning all the positive things about that shot, correcting possible errors, accepting its good qualities and waiting to see how the target reacts when it is hit. A warrior of light, once he has done and transformed his intention into gesture, need fear nothing else: he has done what he should have done. He did not allow himself to be paralysed by fear. Even if the arrow failed to hit the target, he will have another opportunity, because he did not give in to cowardice.

THE SECRET OF SUCCESS IN LIFE

Pankaj Dhavale
B.Pharm. Final year

It is not immediately obvious what it means to be successful in life. The term is used generally to describe a professional success that is, signal achievement at work, indicated in part, but only in part, by having made a lot of money. Sometimes success mean's preeminence in politics or science or sports in a manner that does not necessarily imply financial attainment, but rather public recognition. Those who become famous in the art or by virtue of charitable acts or acts by bravery are thought to be successful also. That is not what most people means by success, but a good case can be made for that achievement being especially important and different societies have regarded the work by bringing up the next generation as critically important.

Let me say what I mean by success: Success is the ability of individual to reach their own goals and achieve their own purpose which keeps oneself alive and feel happy in long life. I do not mean goals such as becoming a movie star or winning the Nobel Prize in literature or becoming President of India or simply making more than everybody else.

There is one overriding quality of mind and personality that weighs more strongly than anything else in determining eventual success. It is character. Eventual success depends more than anything else on the ability to keep striving in the face of disappointment and rejection and failure.

I have been struck over the years by how many people fail despite growing up with all the advantages of money and good health and by how many other start off impaired and impeded by emotion and physical illness and being born into dysfunctional and abusive families and still manage to succeed.

A man who could not attend school growing up because of a phobia which then prevented him from leaving his neighborhood, but who ended up owning three or four food franchises

I remember a very troubled young man who managed to overcome from drug addiction just by recalling his mother voice which was recorded by his father after his mother death.

“I find myself admiring these people who seem to surmount insurmountable difficulties simply by not giving up. They suffer embarrassment and sometimes humiliation and yet they do not give up”.

YOU CAN'T RIDE THIS BICYCLE (because your brain won't let you)

*Pradna Naykodi
B.Pharm Final Year*

People often say that doing something after you haven't done it for a long time "is just like a riding bicycle".

This is essentially saying that once you have managed to do something, it's a lot easier to do again. In the future people try to find out why almost everyone fails at the simple task of riding a bicycle i.e. just slightly different from ones. Everyone knows how to ride: when steer in one direction, the wheel moves in the opposite direction. The problem with this is that while your brain is very good at learning new skills through repetition, this can leave it stuck with a bias. When it is faced with a new problem which is similar to one it has previously mastered, it will automatically try to use the previous solutions. This will happen even if the person has the information on how to come to the solutions: the brain will still try to use the previous understanding. And here is the reason; neuro scientist tells us that our brain is less than 5% of body mass however it consumes more than 20% of the body's energy. The brain less energy to hold on to old beliefs and habit then it does to start from scratch. Emotions play a big part in the process when we hear evidence or stories which confirm a belief, we often feel more secure and confident. The opposite is also true.

So seek out opposing points of view and spent time understanding how they are developed. Even one should try to understand i.e., brain will tell him the opposite ideas are wrong, misinformed or stupid to get rid of from this kind of problems. When you are setting yourself and innovation or idea challenge, always ask yourself how someone without your knowledge would approach a problem. This is called "Vuja De", where you approach everything as if it's the first time you have experienced it, and it can provide you with significant insights.

So "RIDE AS MUCH OR AS LITTLE, OR AS LONG; OR AS SHORT AS YOU
FEEL, BUT RIDE".
