### **17. Orphanage Visit report**

A visit to an Orphanage is a life-changing experience as it is filled with emotions and sentiments. We were lucky to get an opportunity to visit an Orphanage named SGMSPM,s Shri Gajanan Maharaj Kanya Chatralay (shelter home for girls) on January 26, 2021. Due to Covid-19, Pandemic situation only 30 Girls with 1 care-taker and a woman in charge were present at the time of visit. It was a twostorey building with a terrace. The age group of the girls were ranging from 10 years to 16 years. When we entered, most of the girls started staring at us. We had brought food with us. We all interacted with them. After interacting with girls, we found out that everyone was so active and happy there. Elder girls were informing us about the rules and regulation that everyone in the shelter is supposed to follow. Like no one can leave the hostel without permission, cleanliness in the premises, discipline in their daily activities etc. After visiting the orphanage you start appreciating the little things in life when you see people who don't have them. Only at such times do you tide over the insignificant and immaterial things and appreciate the bigger picture.

### 18. Voter's Day

### PLASTIC AWARENESS

Mr. Kiran Mahajan Department of Pharmaceutics, SPCOP, Otur

Plastic products have become an integral part of our daily life as a result of which the polymer is produced at a massive scale worldwide. On an average, production of plastic globally crosses 150 Million tons per year. Its broad range of application is in packaging films, wrapping materials, shopping and garbage bags, fluid containers, clothing, toys, household and industrial products, and building materials. It is estimated that approximately 70% of plastic packaging products are converted into plastic waste in a short span. Once plastic is discarded after its utility is over, it is known as plastic waste. It is a fact that plastic waste never degrades, and remains on landscape for several years. Mostly, plastic waste is recyclable but recycled products are more harmful to the environment as this contains additives and colors. The recycling of a virgin plastic material can be done 2-3 times only, because after every recycling, the plastic material deteriorates due to thermal pressure and its life span is reduced. Hence recycling is not a safe and permanent solution for plastic waste disposal. It has been observed that disposal of plastic waste is a serious concern due to improper collection and segregation system. Burning of plastic results into formation of a class of flame retardants called as Halogens. Collectively, these harmful chemicals are known to cause the following severe health problems: cancer, endometriosis, neurological damage, endocrine disruption, birth defects and child developmental disorders, reproductive damage, immune damage, asthma, and multiple organ damage. The Government of India notified Plastic Waste Management (PWM) Rules, 2016 on 18th March, 2016, superseding Plastic Waste (Management & Handling) Rules, 2011. These rules were further amended and named as 'Plastic Waste Management (Amendment) Rules, 2018.

### **MENTAL HEALTH**

Mr. Sahil Bashir Shaikh M.Pharm I<sup>st</sup> Year, Department of Pharmaceutics, SPCOP, Otur

According to WHO, there is no single 'official' definition of mental health. Mental health refers to a person's psychological, emotional, and social well-being; it influences what they feel and how they think, and behave. The state of cognitive and behavioural well-being is referred to as mental health. The term 'mental health' is also used to refer to the absence of mental disease. Mental health means keeping our minds healthy. Mankind generally is more focused on keeping their physical body healthy. People tend to ignore the state of their minds. Human superiority over other animals lies in his superior mind. Man has been able to control life due to his highly developed brain. So, it becomes very important for a man to keep both his body and mind fit and healthy. Both physical and mental health are equally important for better performance and results.

### Negative Impact of Mental Health Since 2004

The way we physically fall sick, we can also fall sick mentally. Mental illness is the instability of one's health, which includes changes in emotion, thinking, and behaviour. Mental illness can be caused due to stress or reaction to a certain incident. It could also arise due to genetic factors, biochemical imbalances, child abuse or trauma, social disadvantage, poor physical health condition, etc. Mental illness is curable. One can seek help from the experts in this particular area or can overcome this illness by positive thinking and changing their lifestyle. Regular fitness exercises like morning walks, yoga, and meditation have proved to be great medicine for curing mental health. Besides this, it is imperative to have a good diet and enough sleep. A person needs 7 to 9 hours of sleep every night on average. When someone is tired yet still can't sleep, it's a symptom that their mental health is unstable. Overworking oneself can sometimes result in not just physical tiredness but also significant mental exhaustion. As a result, people get insomnia (the inability to fall asleep). Anxiety is another indicator. There are many symptoms of mental health issues that differ from person to person and among the different kinds of issues as well. For instance, panic attacks and racing thoughts are common side effects. As a result of this mental strain, a person may experience chest aches and breathing difficulties. Another sign of poor mental health is a lack of focus. It occurs when you have too much going on in your life at once, and you begin to make thoughtless mistakes, resulting in a loss of capacity to focus effectively. Another element is being on edge all of the time.

### विकास पर्यावरणाचा

Mr. Jaydeep Mukund Kale B.Pharm II<sup>nd</sup> Year, SPCOP, Otur

निसर्गाचं चक्र फिरलं की दुष्काळ पडतो .पण निसर्गाचं चक्र का फिरतं याचा आपण साधा विचारही करत नाहीत .मानव प्राणी स्वतःची आततायी भूक भागवण्यासाठी व विकासाच्या नावाखाली जंगलेच्या जंगले नष्ट करत आहेत .व सिमेंट ची जंगले उभी करत आहेत. एकीकडे पर्यावरण वाचवा संदेश देण्यासाठी कार्यक्रम घेतले जातात तर याचं कार्यक्रमाचे झेंडे लावण्यासाठी झाडाच्याच फांद्या मोडल्पा जातात. एकीकडे पर्यावरण दिन साजरा केला जातो तर दुसरीकडे विकासाच्या नावाखाली , रस्ते बांधण्यासाठी,कॉरीडोर उभरण्यासाठी,स्मार्ट सिटीच्या नावाखाली जंगले भुइसपाट केली जात आहेत. आज त्याचाच दुष्परिणाम म्हणून उन्हाळ्यात पाऊस अन् पावसाळ्यात ऊन अन् हिवाळ्यात गारा असा फटका बसतो आहे. आणि त्यामुळेच दुष्काळ , अावर्षण ,गारपीठ यांसारख्या समस्यांना सामोर जाव लागत आहे. विकासाच्या नावाखाली महाभयंकर प्रदूषण होत आहे तर एकीकडे बेसुमार वृक्षतोड़ होत आहे. पावसाने दांडी मारली आहे. पिण्याच्या पाण्यासाठी वणवण भटकंती करावी लगते. पशु- पक्षी तहानेने तड़फड़तात प्रदूषणाने अनेक नवीन रोग निर्माण होऊ लागले आहेत .हे कुठेतरी थांबायला हवं ना त्यासाठी पर्यावरण जनजागृती करणं गरजेच आहे. सर्वसमान्यांच्या मनात पर्यावर्णाविषयी आपुलकिची भावना निर्माण व्हायला हवीं . आणि पर्यावरणाचा विकास देखील व्हावा. नाहीतर आपण

जंगले भकास करुन कसला विकास साधणार.
