Report of Environment Field Trip (2019-2020)

To undertake the environmental field work which is a part of EVS syllabus a visit organized by college to Maharashtra Shasan Junnar Vanvibhag, Dingore. Which is near to Dingore village. This place is near about twenty five km away from our college. This group consist of first year B. pharm students. After reaching the destination different groups were formed to study the forest ecosystem as well as various animal and birds habitat.

The forest is divided in three parts such as Charakvan, Nakshatrvan and forest area. It also contain a small Matibandhara and water tanks. The students were enthusiastic about eagerly collecting samples of flora and the fauna from the forest. Teacher explained about various natural resources available from forest. Forest also contain one small compost mannuar preparation system which is also helpful information to our students. For each of the new findings students were eagerly taking photographs which would help them in preparing reports.

natural resources, energy conservation, pollution, nuclear hazards and disaster management to

understand their responsibilities toward the nature. Forest contain various medicinal plant which are we labeled with their name and uses, these boards gives various helpful information to our students.

Report of Plastic Awareness Camp (2021-2022)

Sharadchandra Pawar college of pharmacy Otur arranged the Plastic Awareness Camp for Second year B. Pharm students on the occasion of world Pollution control day at Shivneri Fort. A total number of sixty students were taken for the field work. The purpose of visit was to collect plastic material on Fort. On this occasion Principle Sir shared his view on Plastic Waste recycling. We explained about harmful health effect of plastic on human health like it may pollute Groundwater and soil . Burning of plastic results into formation of a class of flame retardants called as Halogens. Collectively, these harmful chemicals are known to cause the following severe health problems: cancer, endometriosis, neurological damage, endocrine disruption, birth defects and child developmental disorders, reproductive damage, immune damage, asthma, and multiple organ damage.

After reaching the destination different groups were formed to collect the plastic bottles and other plastic material. In reality, plastic is not a problem. The problem is irresponsible human behavior in disposing of plastic. If disposed of sensibly, it can actually do well to the environment. But people or tourists who come to visit the fort come and enjoy the place and make it dirty by throwing plastic bottles, plastic wrappers and many more. So we motivated students to collect plastic from the area and make it plastic-free. Our students also worked well and collected all the material and then given for further process.
